A.1 Introduction

This is a guide on how to initiate and use the Dual SkyPro XGPS160 with PFC Training Devices.

A.2 Installation and Configuration

This GPS unit is an option that is available for our FAA Approved systems. If ordered with the system, software will come preinstalled and configured for proper operation. Proceed to the computer connection step and connect the unit now.

If you are adding this option after the original sale our support team will install and configure the software.

NOTE: Do not connect the unit until you are instructed by technician

A.3 Computer Connection

Connecting the Dual SkyPro requires one USB connection to the computer and the other side of the cable will connect a mini USB on the Dual SkyPro GPS.

A.4 Electronic Flight Bag Software Installation

Electronic Flight Bag (EFB) software must be installed and have been run at least once on your Apple or Android Device.

A.5 Operation

1. Press and hold the power button until the unit is OFF.

2. Start your system.

3. Once the system is running and you have the Instructor's Interface on the instructor's display turn on the unit.
4. Pair your tablet or phone via Bluetooth with the SkyPro.
5. Set your software to accept position from Bluetooth.

A.6 Enabling Communication To ForeFlight

1. Launch ForeFlight on your iPhone or iPad, and launch X-Plane on your computer.
2. In ForeFlight, tap on DEVICES>SETTINGS>DIRECT CONNECTION.
3. Change option to ON
