**indicate current selection**

NOTES:
Not all aircraft panels are equipped with the above instruments.
If the instrument is not on the panel the encoder or associated pushbutton
will have no function.

Connections:
USB
12v Universal power supply
Microsoft FSX and X-Plane compatible
X-Plane Plug-in included (on CD)

Installation:
Connect USB connector to back of RIC.

The RIC is a USB (HID) device and will self detect
in most Windows operating systems when plugged in.

Plug in power supply.

Note: You will need load FSUIPC for advanced
functionality when using Flight Simulator
